0956	Welding Technology	*	*	*	*	*

* data unavailable or too few completers to report

** most recent year available

Definition: Job placement rates for CTE programs with consistently more than ten completers at WHC Coalinga. Based on employment one year (four quarters) after last enrollment at WHCCD. Primary source of job placement rates is the CTE Launchboard which relies on California's Employment Development Department's Unemployment Insurance data of students who completed a WHCCD CTE program to determine employment.

Retrieved from <https://www.calpassplus.org/LaunchBoard/Community-College-Pipeline.aspx>

Notes. Based on records submitted to the California Community Colleges Chancellor's Office Management Information System. Employment data specifically comes from California's Employment Development Department's Unemployment Insurance data. Therefore, this data excludes employment in the military or federal government, self-employment, out-of-state employment, unemployment, and not in the workforce after completion of an award. Cohort determined as completers from that year that did not re-enroll in another term or transfer to another institution. Cohort excludes any K-12 students and must have valid social security number. Employment determined by unemployment insurance wage filing and determined at the 4th quarter following exit. Retrieved from <https://www.calpassplus.org/LaunchBoard4/Program-Tables>
